Security Monitor Pro is the perfect solution for complex security problems. It can monitor and record from up to 16 IP cameras simultaneously, create continuous video recordings, and preview multiple cameras in a single window. Each camera has its own individual monitoring and recording settings. When motion is detected, it can send email, record audio and video, and/or sound an audible alarm. The schedule can be the same each day, different for each day of the week, or include one-time events.
